AUTHOR INDEX FOR VOLUME 39	376

Digitized by the Internet Archive
in 2026

INFORMATION FOR AUTHORS

The MICROCHEMICAL JOURNAL will invite research papers on all phases of chemistry, including clinical and biochemical, which involve small-scale manipulation. This will include both organic and inorganic work on preparation, purification, separation, detection, determination, trace analysis, and all types of instrumentation.

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been and will not be nor is presently submitted elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out; further, that any person cited as a source of personal communications has approved of the citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in the *Microchemical Journal* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Address. Manuscripts should be submitted to **Dr. Peter N. Keliher, Chemistry Department, Villanova University, Villanova, Pennsylvania 19085**. Manuscripts in the area of Bioanalytical Chemistry should be submitted to **Dr. Paul Hemmes, Angenics, Inc., 100 Inman Street, Cambridge, Massachusetts 02139**.

Manuscripts should be concise and consistent in style, spelling, and use of abbreviations. American spelling conventions should be used. At least two copies should be submitted, each copy to include all figures and tables. The original copy must be typewritten, double-spaced, on one side of white bond paper, about $8\frac{1}{2} \times 11$ inches in size, with one-inch margins on all sides. Each manuscript should have a separate title page noting title of article, authors' names (without degrees), a running title (not exceeding 35 letters and spaces), and address to which proof should be mailed. Please number all pages of manuscript.

Authors are encouraged to use descriptive subheadings in this order: Abstract, Introduction, Materials and Methods, Results, Discussion, Acknowledgments, and References. Every article should have a definitive title. The use of series numbering is strongly discouraged.

In the Methods section, authors should draw attention to any particular chemical or biological hazards that may be involved in carrying out the experiments described. Any relevant safety precautions should be described: if an accepted code of practice has been followed, a reference to the relevant standards should be given.

Units of weight, measures, etc. when used in conjunction with numerals should be abbreviated and unpunctuated (e.g., 10%, 50 ml, 3 g, 8 cm, 5 μ g, 3 μ l).

Names of compounds should agree with those presently in use by Chemical Abstracts.

Figures should be numbered consecutively with Arabic numerals in order of mention in the text: each figure should have a descriptive legend. Legends should be typed together on a separate sheet, double-spaced.

All figures and illustrations are to be submitted in such form as to permit photographic reproduction without retouching or redrawing. This includes the lettering which is reproduced as part of the photoreproduction and is not set in type. (Lettering should be done with a lettering device, such as Leroy.) Line drawings should be carefully drafted with black India ink on white drawing paper or blue drafting cloth, no larger than 8.5×11.5 inches (21×27.5 cm). The lettering should be large enough so that when reduced by two-thirds it will still be legible. High quality glossy prints are acceptable. Xerox prints are not acceptable. Illustrations in color can be accepted only if the authors defray the cost.

Tables should be typed on separate pages, numbered consecutively with Arabic numerals in order of mention in the text. All tables should have descriptive headings, typed (double-spaced) above the table.

Footnotes should be designated in text by superscript numbers and listed on a separate sheet: in tables, by superscript letters and placed at bottom of page containing table.

References should be numbered consecutively in order of their citation. The text citations may then

consist of either just the italic number of the reference enclosed in parentheses and set on the text line or of the name (or names) of the author(s) followed by the italic number enclosed in parentheses. In the text citation, if there are more than two authors of a given reference use the surname of the first author followed by "et al.," "and co-workers," or "and associates." All authors' names should be included in the reference list itself.

For abbreviations of journal titles in the reference list please follow the forms used in *Chemical Abstracts Service Source Index*, 1985.

Pattern styling, punctuation, and capitalization after these examples, noting the particular style for journal articles, books, and edited (multi-author) books.

1. La Plante, R. J.; Thibert, R. J. *Microchem. J.*, 1985, 31, 304-317.
2. Allen, R. C. Biochemiexcitation: Chemiluminescence and the study of biological oxygenation reactions. In *Chemical and Biological Generation of Excited States* (W. Adam and G. Alento, Eds.), pp. 61-121. Academic Press, New York, 1982.
3. Vanasse, G. A. *Spectrometric Techniques*, Vol. 3. Academic Press, New York, 1984.

The use of "personal communication" and "unpublished observations" as citations in the text should be avoided.

Proofs will be sent to the authors with reprint order forms. Fifty reprints of each article will be provided free of charge.

Outstanding New and Recent Titles

ANNOUNCING A NEW EDITOR!

Advances in Inorganic Chemistry Volume 32

edited by
A.G. Sykes
The University, Newcastle upon Tyne, England

From the Reviews of Previous Volumes:

"These... volumes continue the tradition of presenting timely summaries of the current state of understanding a wide variety of special topics.' ... Overall, these... volumes provide much useful information and are quite well written."

—JOURNAL OF THE AMERICAN
CHEMICAL SOCIETY

Under the new editorship of A.G. Sykes, **Advances in Inorganic Chemistry** will present scholarly reviews in all areas of inorganic chemistry and radiochemistry as well as expanded coverage of the rapidly developing fields of bioinorganic and solid state chemistry. Commencing with this volume, the editor will continue the tradition of H.J. Emeleus and A.G. Sharpe of including a wide diversity of topics in each volume.

CONTENTS: *J. Springborg*, Hydroxo-Bridged Complexes of Chromium(III), Cobalt(III), Rhodium(III) and Iridium(III). *D.S. Moore and S.D. Robinson*, Transition Metal Derivatives of Triazoles, Tetrazoles, Pentazoles, and Hexazine. *A.G. Lappin and A. McAuley*, The Redox Chemistry of Nickel. *R. Cammack*, Nickel in Metalloproteins. *A.R. Butler, C. Glidewell, and M.-H. Li*, Nitrosyl

Complexes of Iron-Sulfur Clusters. *J.K. Beattie*, Dynamics of Spin Equilibria in Metal Complexes. Each chapter includes references. Index. 1988, 382 pages, \$81.00*
ISBN: 0-12-023632-X

*Order Volumes 1–32 and save 40% off the list price! For more information, contact Academic Press at the number below.

SAVE \$33.50 ON THE SET!

The Chemistry of Inorganic Homo- and Heterocycles Volumes 1 and 2

Ionel Haiduc
Babes-Bolyai University, Cluj-Napoca, Romania
D. Bryan Sowerby
University of Nottingham, England

Inorganic ring systems are one of the major developing areas of inorganic chemistry, providing inorganic analogues of organic heterocyclic systems. This two-volume work provides the only entire integrated coverage of inorganic homo- and heterocyclic ring systems. Each chapter has been written by experts engaged in active research in the area under discussion.

Major topics include:

- *Homocycles* based on boron, silicon, germanium, tin, phosphorous, arsenic, sulphur, and selenium
- *Heterocycles* based on combinations of the above elements with nitrogen, oxygen, sulphur, and selenium.

Volume 1: 1987, 416 pages, \$108.00*
ISBN: 0-12-655775-6

Volume 2: 1987, 877 pages, \$117.00*
ISBN: 0-12-655776-4

*Set price, \$191.50, a savings of \$33.50

Theory of Particulate Processes

Analysis and Techniques of Continuous Crystallization
Second Edition

Alan D. Randolph
University of Arizona, Tucson
Maurice A. Larson
Iowa State University of Science and Technology, Ames

1988, 307 pages, \$55.00
ISBN: 0-12-579652-8

Preparative Chemistry Using Supported Reagents

edited by
Pierre Laszlo
Université de Liège, Belgium, and Ecole Polytechnique, Palaiseau, France

CONTENTS (Section Headings): Supported Reagents: General Principles. Physico-Chemical Studies of the Structure of the Solid Supports. Polymer-Supported Reagents. Graphite Intercalated. Alumina-Supported Reagents. Silica-Supported and Silica-Gel-Supported Reagents. Use of Zeolites as Supports. Clay-Activated Organic Reactions. 1987, 545 pages, \$110.00
ISBN: 0-12-437105-1

ACADEMIC PRESS JOURNALS

Excellence in Scientific Publishing

When you need the latest information, turn to Academic Press. We publish journals covering 28 disciplines. Respected in their fields, Academic Press journals have carried a reputation of quality for more than 45 years.

Journal Disciplines

Anthropology and Archaeology	Environmental Sciences
Astronomy	Food Sciences and Nutrition
Biochemistry	History
Biology	Immunology and Pathology
Biomedical Sciences and Basic Medical Research	Language Sciences
Botany	Law
Chemistry	Library and Information Sciences
Clinical Medicine	Mathematics
Clinical Psychology and Psychiatry	Physics
Computer Science	Psychology
Earth Sciences	Social Sciences
Economics	Speech and Hearing Sciences
Education	Toxicology and Pharmacology
Engineering	Zoology

For information concerning a particular journal or discipline, please refer to S9099A and write or call:
